PROFILE

Junior Backend Laravel Developer with real production experience in building secure RESTful APIs, modular architectures, and scalable multi-tenant systems. Skilled in database design and backend feature development using Laravel Modules and clean code principles. Passionate about solving complex problems and continuously improving code quality while contributing effectively in team environments.

SKILLS

Programming & Database

PHP, JavaScript, HTML, CSS, Python, MySQL, Firebase, Livewire.

Frameworks & Tools

Laravel, Bootstrap, Git, Composer

Concepts

OOP, SOLID Principles, RESTful APIs, Design Patterns

Soft Skills

Problem-Solving, Time Management, Teamwork, Adaptability

EXPERIENCE

Backend Developer, *Brmja Tech* [🔗](#)

08/2025 – Present
Giza, Egypt

- Built and integrated RESTful APIs using Laravel for production systems.
- Developed dynamic admin dashboards and structured relational databases.
- Worked with Laravel **Modules Architecture** to deliver scalable, maintainable features.
- Implemented **Multi-Tenant** structures to support multiple business clients on shared systems.
- Integrated **Firebase** services into backend operations.
- Applied **MVC principles**, clean code practices, and Git workflow in team development.
- Focused on performance optimization, debugging, and secure data handling.

Web Developer, *websolla* [🔗](#)

06/2025 – 08/2025
Cairo, Egypt

- Develop dynamic websites and admin dashboards using Laravel.
- Convert UI designs into functional interfaces with backend logic.
- Focus on clean code practices and smooth admin panel performance.

Backend Developer (intern), *Brmja Tech* [🔗](#)

02/2025 – 06/2025
Giza, Egypt

- Participated in API development for real-world applications.
- Designed custom dashboard features and performed database structuring.
- Debugged and enhanced Laravel-based systems in a team environment.

PROJECTS

Invoice System [🔗](#)

A Laravel-based system for managing invoices, with features for invoice creation, payments, and printing. Includes sections for departments, products, and user permissions.

Tech Stack: Laravel, PHP, MySQL, Bootstrap

Customize CRM System

Developed an internal Laravel CRM with HMVC architecture. Features included client management, invoicing with email, contract control, user permissions, employee reporting, and attendance API integration.

Tech Stack: Laravel

Online Pay Solution

Developed a backend platform that serves as a secure intermediary between users and Fawry services. Users register through an API-based client system and submit verification documents, while admins review and approve accounts through an advanced dashboard. The platform includes automated email notifications and multi-language support.

Tech Stack: Laravel 11, PHP 8.2, MySQL, Sanctum

Faya, (In Progress)

Working on backend development for “Faya ERP”, a modular multi-tenant system for restaurants and cafés. Responsible for implementing new features using Laravel Modules Architecture, designing and improving database workflows, and integrating services between different business domains such as inventory and sales. Focused on performance optimization, clean code practices, and scalable solutions to support multiple tenants within a shared database environment.

Tech Stack: Laravel 11, MySQL, Multi-Tenant Architecture, Modular Development, RESTful APIs

Bayt-Link, (In Progress)

Developed the backend for a full property-management system serving property owners and residents. Built modules for property structuring (buildings, floors, units), user roles, financial management (revenues, expenses, maintenance fees), online payments, voting on decisions, complaints, internal chat, technician directory, notifications, and subscription plans. Implemented clean RESTful APIs, secure validations, and optimized database workflows.

Tech Stack: Laravel 12, MySQL, Livewire, RESTful APIs, Clean Architecture.

LRG

Worked on dynamic dashboard development and real-time data sync between backend and frontend.

Tech Stack: Laravel 10, PHP, MySQL, Bootstrap

Bait-Elkhebra

Developed and customized a dynamic Laravel-based dashboard with real-time data synchronization, ensuring a seamless connection between backend operations and front-end user experience.

Tech Stack: Laravel 10, PHP, MySQL, Bootstrap

EDUCATION

Bachelor’s Degree in Computer Science,

10/2020 – 07/2024

Faculty of Computers and Artificial Intelligence, Benha University

CERTIFICATION

Building Web Applications using

PHP & MYSQL

Mahara tech

Dec 2024 - Jan 2025
