PROFILE

Backend Developer with 2+ years of experience building production Laravel APIs for SaaS, ERP, healthcare, e-learning and booking platforms. Sole backend owner for multiple products at a Saudi software company and co-founder of CodeLine Tech. Experienced in multi-tenant architecture, RBAC, payment gateway integrations (Paymob, Dineropay), WhatsApp Business API, bilingual Arabic/English APIs and automated testing with Pest. Currently working on ZATCA e-invoicing integration.

SKILLS

Backend & APIs:

PHP 8.4, Laravel 11/12/13, Node.js, Express.js, RESTful APIs, Laravel Sanctum, JWT, Laravel Reverb (WebSockets), Livewire, Blade

Database & Testing:

MySQL, Database Design, Query Optimization, Transactions, Pest PHP, Feature Testing

Architecture:

OOP, SOLID, Design Patterns (Strategy, Adapter, State Machine), Service Layer, Clean Architecture, HMVC, Laravel Modules, Multi-Tenant SaaS, RBAC

Integrations & Tools:

Paymob, HyperPay, Stripe, WhatsApp Business API, Firebase (FCM, Auth), Google/Apple Sign-In, Git, GitHub Actions CI, Postman, Apidog, Composer

EXPERIENCE

Backend Developer, Beyonex IT

- Sole backend developer for the company, owning architecture, database design and API delivery across 7+ internal and client products in HR, healthcare, wellness, legal and recruitment domains.
- Built Beyonex Workflow (internal HR/CRM platform), Gaia Spa (booking platform) and Elagy Care (e-pharmacy platform) end-to-end.
- Integrated WhatsApp Business API, Dineropay, Firebase and Google/Apple Sign-In across products.

02/2026 – Present
Riyadh, Saudi Arabia
(Remote)

Backend Developer, Brmja Tech

- Developed scalable RESTful APIs using Laravel 11/12.
- Led the backend of Bayt-Link, a SaaS property management system (see Projects).
- Built Faya ERP, a modular multi-tenant ERP for restaurants & cafés, implementing inventory and sales workflows with Laravel Modules.
- Developed an internal CRM using HMVC architecture: clients, contracts, invoicing with email, permissions and attendance API integration.
- Optimized database queries and API performance for high-traffic endpoints.

10/2024 – 2026
Giza, Egypt (Onsite)

Web Developer (part time), websolla

- Developed dynamic admin dashboards using Laravel and Blade.
- Refactored legacy code and improved admin panel performance.

06/2025 – 08/2025
Cairo, Egypt

SELECTED PROJECTS

Darabny: Training Marketplace Platform

- Built 460+ REST API endpoints across 5 portals (students, training providers, instructors, universities, admins) on Laravel 13.
- Implemented bookings, Paymob card/wallet payments, manual payment flows, refunds, provider payouts and invoice generation.
- Delivered QR-verifiable certificates, attendance tracking, Firebase auth & push notifications, and a Scholars subscription module.
- Maintained 100+ Pest feature test files running on GitHub Actions CI.

Tech: Laravel 13, PHP 8.4, MySQL, Sanctum, Paymob, Stipe, Firebase, Pest

Bayt-Link: SaaS Property Management System

- Designed the database architecture for buildings, units, owners and tenant relationships.
- Implemented RBAC and transaction-safe financial workflows for rent collection and expenses.
- Developed complaints, online payments, voting, chat, notifications and subscription modules.

Tech: Laravel 12, MySQL, Livewire, RESTful APIs, Clean Architecture

Beyonex Workflow: Business Management Platform, *Internal Business Management Platform*

- Architected a multi-company platform for HR, CRM, projects/tasks, ticketing and meetings with company/branch-scoped data isolation and RBAC.
- Built the CRM pipeline (quotations → contracts → invoices → payments) and a customer portal.
- Implemented QR attendance with leave approvals, real-time chat with Laravel Reverb, and WhatsApp Business API customer conversations.

Tech: Laravel 12, MySQL, Sanctum, Reverb, WhatsApp Business API, Pest

Gaia Spa: At-Home Spa Booking Platform

- Built a booking engine with therapist schedules, leave management, service areas and distance-based travel fees.
- Implemented loyalty & retention features: membership tiers, packages, session credits, gift cards, vouchers, coupons and referral rewards.
- Designed a pluggable payment gateway layer (Strategy pattern) supporting card, bank transfer and cash, plus Google/Apple Sign-In and FCM push notifications.

Tech: Laravel 13, MySQL, Sanctum, Firebase, Pest

Elagy Care: E-Pharmacy & Prescription Platform, *(in progress)*

- Built the backend for a multi-sided e-pharmacy platform serving patients, doctors, pharmacists, pharmacies, delivery drivers and admins.
- Designed an order state machine with automatic routing to nearby pharmacy branches, stock reservation, drug substitution rules and pickup/delivery verification.
- Integrated HyperPay payments with refunds and cash-on-delivery collection, pharmacy settlements, and pluggable delivery providers (Adapter pattern).
- Secured medical data with MFA/OTP, audit trails, consent management and RBAC, covered by security, privacy and end-to-end feature tests.

Tech: Laravel 13, PHP 8.5, MySQL, Sanctum, Firebase, Pest
